

Wessex Research Group Network *Newsletter*

VOLUME 3, ISSUE 11.

November 2008

November and a warm welcome to three speakers from overseas; Carol Fraser from India, Sam Semir Osmanagich from Bosnia and Herzegovina and Dr Joe Dispenza from the USA. New groups to the network include Fire in the Head (www.fire-in-the-head.co.uk), the Wyvern Dowzers (www.wyverndowsing@freeserve.co.uk), and the Glastonbury Positive Living Group (www.shiny-happy-people.co.uk).

The latest addition to the on-line lecture archive is, Understanding the Living World by Alan Hall. Evolve Your Brain by Dr Joe Dispenza the latest addition to the article archive.

Balancing the Spiritual with the Material

Atlantis; a civilisation that lasted some 10,000 years, fell during a period of planetary transition several thousand years ago, when the Moon fell into the Earth's gravitational field. This caused our planet to tilt on its axis, the poles moving to where the Equator had once been. Drastic and sudden changes in sea levels and climatic conditions followed with many lands that had been warm becoming cold and visa versa. The land mass that was the continent of Atlantis and located in the Atlantic disappeared. Surviving Atlanteans moved to many other parts of the world including Egypt, the America's and Europe.

Atlantean spiritual understanding was far ahead of ours today. Modern man has drifted so far in to the material environment that he has completely shuttered himself from spiritual expression. In contrast the Atlanteans were too philosophical and did not pay enough attention to the material.

An ideal state of balance for those incarnate on Earth is 50% spiritual and 50% material, enabling us to experience the things that the body can know whilst growing spiritually. Due to the extreme philosophical outlook of the ancient Atlanteans they so neglected their material well being that they became selfish. They forgot about the rest of the world and that they had to fit in and work with it. At its zenith, Atlantean society was one based on tolerance, equality and brotherly love; an existence free from belligerence, where beauty and harmony reigned supreme in the minds of men and women, undistorted or narrowed by the selfishness and greed.

In this epoch our fixation with the material at the expense of the spiritual has also made us selfish,

Above: An Emblem of the Atlanteans

narrowing our outlook towards others and our home planet Earth.

The challenge for this generation is to recover, awaken and take forward a spiritual understanding in the heart that has been missing since the fall of Atlantis; accepting each other for what we are, subduing our ego's and come to the simple basic realisation of the futility of our own belligerence.

Our great advantage over the Atlanteans is surely the benefit of hindsight. We must recover the best of what that civilisation achieved spiritually and balance this with the best of what we have achieved; a wonderful technology and an understanding of the material.

It falls to us to ensure that such a day dawns for humanity, one human family, by individually working together and so assisting in bringing about the raising of man's evolution with the spiritual and material and the masculine and feminine each in balance.

An example of the Atlantean language can be found in the on-line digital archive of the WRGNetwork www.wessexresearchgroup.org/digital. Atlantean is believed to have contributed too many early languages, notably Greek, Latin and Egyptian. The nearest language in use today to which it could be equated is archaic Basque. It also contains more guttural sounds which are met with in the Celtic and allied tongues.

Book Review: Evolve Your Brain: The Science of Changing Your Mind by Dr Joe Dispenza

A serious accident led the author to heal himself using the power of thought and this book connects the subjects of thought and consciousness with the brain, the mind, and the body.

Evolve Your Brain explores "the biology of change." That is, when we truly change our mind, there is a physical evidence of change in the brain. As an author of several scientific articles on the close relationship between the brain and the body, Dr. Dispenza ties information together to explain the roles these functions play in physical health and disease. For further information visit www.drjoedispenza.co.uk or email info@drjoedispenza.co.uk

Book Review: Awakening Consciousness: Selected Lectures of Sir George Trevelyan

The changing times, for which Sir George was a prophetic voice, are now looming large in our awareness. Through his lectures of the last three decades of the twentieth century, Sir George offered a statement of spiritual vision and an affirmation of hope in darkening times.

He spoke of an emerging synthesis between science and spirituality and put his faith for the future of society in the transforming power of spiritual transformation. For more information about the book and book launch event contact the Wrekin Forum www.wrekinforum.org
