

Wessex Research Group Network *Newsletter*

VOLUME 4, ISSUE 5.

May 2009

The May newsletter has an earthy feel, with articles on sacred geometry, earth energies, megalithic culture as well as a full listing of events. The month ahead also sees the arrival of Carol Fraser who has travelled from India to facilitate a series of talks and workshops at Springhead, Sherborne, Elworthy and Scotland. A welcome also to the Bournemouth Channelling and Mediation Group and to 'In Search of the Sacred' www.insearchofthesacred.com a new group located in Cheltenham.

Conversations with Pan by R Ogilvie Crombie is the latest addition to the on-line digital lecture archive with Ley Lines and Ley Line Power Points by Susan Rooke the latest addition to the on-line article archive.

Inter-dimensional Planetary Awakening by Dean Carter and Lorna Heath

The Pure Sounds of crystal and Tibetan bowls and vocal overtone take us into many different domains and dimensions, to the extent that this form of sacred sound could justifiably be termed 'Inter-dimensional Sound'. Working with these 'pure sounds', has enabled us to form a psychic/energetic link with the phenomena of so-called 'orbs' (real name EL-AEONS (see WRGNetwork Newsletter August 2008). Our research has led us to use pure sound has an important mechanism for working with, healing and re-connecting Earth Energies.

This work had taken us, for example, into pre-reformation churches, which as many know are deliberately built on sites where earth-energies converge, the site usually having been previously been a mound or some other structure pre-existent to so-called 'Christianity'. A number of 'power points' as they might be called can be expected to be found in the interior of ancient churches, and part of our work has been to re-awaken these energy-points through use of Pure Sound.

Imagine our surprise when as well as getting photographic evidence of EL-AEONS, we first viewed the images presented here; visual records of

Earth-Energies. After, or even during a period of vocal overtone, the energies, as you can see, seem to 'fountain' up in these breathtaking forms, we think from energy point to energy-point. They seem to be doing this only in the summer months, and only appear on camera for us after a certain series of events within our own personal path of development; a point at which our own energetic fields had expanded and/or our vibratory level had heightened to a sufficient degree for this interaction to take place.

The energies reported by dowsers and drawn and mapped by them are apparent here just as they have been depicted. The 'banding' that many dowsers have reported in their findings also being obvious to all, but for the first time in photographic form. We take this as yet more evidence of a raising of the electro-magnetic energetic/vibratory levels of this our planet, and of those who are consciously raising their own vibratory levels to meet and correspond to the changes already underway. The planet is beginning the process of ascension. Are you moving with it yet? Have you felt the rain-drops? Are you creating your energetic Ark?

For further information about the awakening of earth energies email Dean at the Centre for Pure Sound at deancarter54@hotmail.com. Dean and Lorna will also be presenting their earth energies research at the Sherborne group during May.

Sacred Geometry Works!

By Claudie Planche

Sacred Geometry is present in many traditions and civilisations throughout the world. Inspiring works of architecture and artistic mandalas, using the Phi golden ratio, enhance man's physical and spiritual harmony with nature, uniting the cosmos, the plants, the minerals and the human body itself.

The universe is the living expression of patterns in matter: mater/pater, from the latin, or mother/father united in creation. Over the last 20 years, particularly in this country, there has been an abundance of crop circles and stunning geometric formations have been prompting the modern world to remember this universal wisdom that the ancients knew so well.

As numbers unfold in space, from the point to the line and onwards into the next dimensions, we can recognise the basic shapes. For example, fitting perfectly within a sphere, the 5 Platonic solids represent the Elements of Fire, Earth, Air, Water and Ether, the very alchemy of life.

Recently, Quantum Physics has started to expand our perception of matter, and as we go deeper into the subatomic world, we find electro-magnetic vibrations. The geometries of the Platonic and the Archimedean solids contain the same elementary polarity relating to the masculine and feminine potencies of creation. So it is not surprising that human beings have a natural 'resonance' with geometric shapes. Through muscle testing of specific

key points in our body, as used in The Template work, we find that interaction with sacred geometry strengthens us physically and at all levels. It is time to realise how Sacred Geometry works beautifully around us and within us. Claudie Planche gives regular workshops and talks on Sacred Geometry in Glastonbury. She will also be in Totnes on May 30th. For further information Tel 01458 835506 or log on to www.Stargaia.com

Megalithomania

Like many of the 1000 or so events listed on the calendars of the Wessex Research Group Network, Megalithomania is one organised through the initiative and determination of individuals who in this instance, aim to stimulate discussion on the ancient megalithic sites and all areas relating to that, including archaeoastronomy, geomancy and geometry.

Megalithomania was created as a forum to discuss all sides of the megalithic debate, with the intention of unlocking the truth about this incredible lost part of history and the sophistication of our ancestors; often challenging the perceived academic view of archaeological status-quo regarding the megalithic era. For further information about this year's event call 01458 831800 or log on to www.megalithomania.co.uk

"All are but parts of one stupendous whole ,
Whose body nature is, and God the soul". (Alexander Pope)
