VOLUME 13, ISSUE 9.

September 2018

September 2018; the 21st of the month being the U.N. International Day of World Peace and the 29th St Michaelmas Day the feast day of Michael and all Angels.

Glastonbury WRG have moved to a new venue; the Red Brick Building in Glastonbury. FFI contact Jacqui on 07516816915 or email simmojac@gmail.com

Soul alignment by Ocean Whitehawk is the latest addition to the on-line digital lecture archive www.wessexresearchgroup.org/digital_25.html

Harmonics: The Universal Language

By George Essence

A visiting alien space traveller might be forgiven for assuming that Stonehenge and the Great Pyramid were deliberate markers. They would recognise the Intelligence built into them that we only feel subconsciously. With their dimensions perceived as whole number ratios, they become chords in the pentatonic scales of music.

Music is an excellent intelligence form. It is far more versatile than the binary form used by computers and sound recording, which is digital. The intelligence lies in the wave form itself, and is eradicated once the music has been digitised. The primordial energy of the Universe could have crystallized harmonically and become capable of holding data, the most obvious form of which would be music. The pentatonic scale conveniently avoids discords, which could then be utilised as "breaks" separating the data units.

This is more likely than it might seem. Atoms themselves have musical "quantum" properties. At a cellular level a single living creature is in fact billions of autonomous cells coordinated by "listening" to the same harmony. Scientists have no conception of how to achieve this themselves. They do not know what life itself is, even in the simplest living creature.

Life itself is the interaction of intelligence with matter, principally with the four main elements of biology, Hydrogen, Oxygen, Carbon and Nitrogen. Seen in their atomic form, their electric relationships are musical. They are the pentatonic chords 3/2, 4/3 and 9/8, and the discord [7/5, Hydrogen-Nitrogen]. It is no coincidence that Nitrogen is the essential ingredient of explosives! The chords themselves are confirmed

in the "interference" lines of Hydrogen in the sun's rays, which make the three whole number ratios, 9/8, 9/10, and 4/3.

7/5 is equivalent to "root 2", and features in Avebury as a "gateway" between an "underworld" (the Ditch) and the upper world of stars and moonlight. The North side has two exact circular arcs in the 7:5 ratio. Where they join is marked by a colossal stone with square corners. It's where the road exits the circle going north. Geometrically, "square" is "root 2" (which was "death" in the Pythagorean school). At Avebury, the souls of the dead "escaped" the Underworld, (the Ditch) and traversed the circle under the Milky Way by the light of the full moon. The souls escaped the Earth by travelling over the North Pole, onto the Milky Way, and across to a destination in Orion. According to a source from the Nazca Plain, and an internal passage in the Great Pyramid, it would be the left hand star in Orion's Belt.

In music we have the octave, fifth, fourth, major third, minor third and tone. As ratios they are 2/1, 3/2, 4/3, 5/4, 6/5 and 9/8. These ratios are built into every Neolithic monument. They are the slopes of pyramids, the diameters of circles. We see monuments like Stonehenge, Avebury and the Pyramids as ancient structures, but to a dispassionate alien intelligence, and in some way to the human culture of 3000 BC, they are basically the 5 note musical pattern of Pan' Pipes. They are familiar to us in the chords of blues and gospel music.

9/8 and 9/10 are the diameter ratios of Stage 1 of Stonehenge (3100BC). The mound ditch and Aubrey holes making three concentric circles. 9/8 and 9/10 make a ratio 81/80, equal to $2^{1/56}$ There are 56 equally spaced Aubrey holes.

Harmonics: The Universal Language continues on Page 4.

Harmonics – The Universal Intelligence (continued)

The smallest Giza Pyramid has a unique rectangular base "modified" so that one face slope is exactly the Latitude of Stonehenge, confirming that the sites are intentionally linked. 9/8 and 9/10 are the edge slopes of two of the three Giza Pyramids and 4/3 is the face slope of the third.

Throughout the ages references to harmonics have been found in all cultures. We find the associated ratio's inscribed onto the walls of Egyptian tombs, they are called "chironomy" and in 3000 BC, they specifically defined music. They are found in Gothic cathedrals, sun flowers, the Fibonacci sequence, and they are the basis of "overtone singing" and the possible wave forms of guitar strings.

The concept of "alien intelligence" becomes more open as science itself advances but we don't have to rely on science to begin to view the world from a different perspective. We are after all spiritual beings having a physical experience rather than physical beings having a spiritual one. Science tends to want to quantify and in so doing narrows everything down but as spiritual beings we should also consider the big picture. Sound and music is everywhere in our modern physical lives but are we underestimating the role that harmonics really plays as a universal language. Relevance is everywhere once you start looking, listening, feeling and intuiting.

Book Review – Chartres. The Throne of Europe

By Roy Snelling

A book that presents the discovery of a landscape zodiac around Chartres Cathedral that covered most of France, Southern England and parts of Holland and Western Germany.

The author begins with an exploration of the Celestial Zodiac and Precession and other pertinent astronomical facts, exploring landscape zodiacs in general, including those found in Britain. In looking at Chartres he first examines its history, going back to the time when it was a Celtic Temple, and the later when the under-crypt was used as a Mithraic Temple by officers in the Roman Army.

Roy then explores the meaning of the Chartres Zodiac, the twelve lines radiating out from the centre of the Cathedral, and the identification of a number of towns and cities of equidistant radius around the Cathedral. Plymouth, Gloucester, Norwich, Leiden, Strasbourg and Montreaux all feature. One line that passed through Paris, when extended beyond the Zodiac circumference passed through Berlin. Another Line reached Vienna and Bratislava. Another Barcelona and another reached Madrid. Three of the twelve lines radiating out from the centre of the Church crossed the Atlantis (Michael-Mary) Line in Southern England.

The book examines the geography, history and culture of each zodiac segment and points the way to the future, leaving researchers to continue the exploration of what this remarkable building means to us. The book contains 32 maps, illustrations and photos and is available as an e-book from Amazon Kindle, W.H.Smith, Kobo, Rakuten and all other e-book libraries. The author (Roy Snelling) can be contacted at roysnelling88@gmail.com
