

Wessex Research Group Network Newsletter

VOLUME 12, ISSUE 8.

August 2017

August and we welcome Somerset Dowers www.somersetdowers.co.uk to the Wessex Research Group Network

The latest addition to the on-line digital audio archive www.wessexresearchgroup.org/digital_23.html is *Japanese Buddhism* by Rev. Ganishan Rock

The Music of the Universe

By George Essence

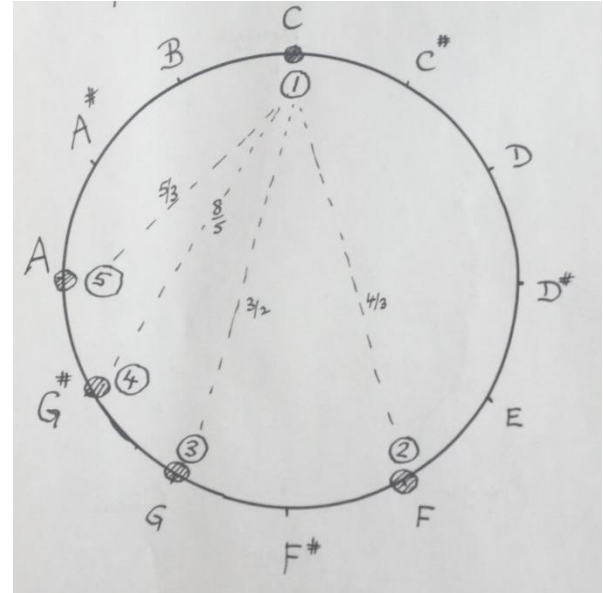

Have you ever wondered where music comes from? Or why animals often seem to dance? Or why rocks and deserts are beautiful? There is an answer that has lain in full view of science for a hundred years and that is that the electrons defining each and every element obey the harmonic laws of music. The elements in the sun [and all stars] are identified in the rainbows that they produce. They carry the "bar code" of every individual element that exists in any given sun. Elements "burn" with distinctive colour and colour is an electromagnetic wave, providing a unique "bar code" of spectral lines.

According to the book of Genesis; rainbows are God's covenant to Noah after the flood. They are made by sunlight shining through falling water. A rainbow is full of little black lines, like bar codes, where the boiling elements inside the sun have absorbed particular wave lengths. These "Fraunhofer" lines were found and measured in the 19th century. Their "harmonic" pattern was recognised and converted immediately into a mathematical formula.

We can now recognise them. Firstly as ratios from the Fibonacci sequence. Secondly as the ratios commonly found in Neolithic monuments. Thirdly, as the foundation harmonic ratios of music [thanks to the work of E.G.McClain.]

The spectrum colours of the rainbow have wave lengths that we measure in Angstrom units (Au). The lowest energy level has the longest wavelength. The wave lengths are 6563, 4861, 4340, 3970 Au, from lowest energy to highest energy. They stretch from red down to ultra violet.

These are "musical notes", with the same precise mathematical/harmonic relationship. With a calculator, you will see that [within a small error] $6563/4861 = 4/3$, $6563/4340 = 3/2$, $6563/4101 = 8/5$, and $6563/3970 = 5/3$.

Above: The 5 Electron Wavelengths for Hydrogen Mapped to Musical Notes

$4/3$ is 5 semitones, a fourth. $3/2$ is 7 semitones, a fifth. $8/5$ is 8 semitones and $5/3$ is nine. $3/2$, $5/3$ and $8/5$ are a sequence from the Fibonacci sequence of ratio that tends to the golden mean. $4/3$ is the "inverse" of $3/2$.

These exact ratios define the difference between the New Stone Age and the Ages that went before. Precisely built monuments like Stonehenge, Avebury, Woodhenge etc in Britain and 4th dynasty pyramids in Egypt at Giza and Saqqara are built to harmonic design. New Stone Age symbols like the axe and dagger derive from these fractions.

Here is a very brief explanation of this idea. We will take the signature of hydrogen as our example (hydrogen has just one electron and is easy to measure and also forms 90% of the sun). Hydrogen has several lines in it's "bar code" and so a study of hydrogen gives us the quantum structure of the electron and the precise quantum energy levels of the "electron shells" surrounding the atom.

The measured wave lengths of Hydrogen its "bar code" occur in the following ratios $3/2$, $4/3$, $5/3$, $8/5$. This is illustrated in the picture above where they are mapped to musical notes. The first three correspond to the chords C F C G a pattern familiar to all musical forms. Interestingly the Fibonacci sequence or ratios begins $1/1$, $2/1$, $3/2$, $5/3$, $8/5$

The Power of Peace

By Swami Aliyananda Paramahansa

The Supreme Soul has taught us as a family about the power of peace! In your meditations please enter the realm, the inner realm of peace. This realm has a state of Supreme Power to overcome the world's delusion and fear by going into peace. The power of peace heals you – in nature we feel peace, in our hearts we can feel peace, in our breath we can feel peace. Peace is the change we have been looking for.

What are the qualities of peace? Meditation opens you to these qualities – the greatest one is love. The love, the peace that passeth all understanding carries you through the life process. We need help with life to journey and not be afraid, not be out of love, not be out of contact with our true self the Supreme Soul.

The Self the immortal being, the light of truth, in this we must trust. Offer your illness with love and trust to God, ask for help, healing, guidance, inspiration, be willing to receive, be vulnerable, be peaceful. Most of all have a positive mental attitude. Life is a process, the more we breathe with the process, the more peaceful we are the better it gets.

Yes we will have ups and downs but the valley will not hold us in sorrow and fear for too long! Fill your body with peace, fill your mind with peace. Then the miracle of God's love and wisdom surrounds you and the inner guidance comes to you and then you can hear! Be unconcerned but by no means indifferent.

God bless you with peace, love, wisdom and strength. Let go, let God, be in the flow with the divine plan, we can change ourselves, we can change the world!

Swami Aliyananda Paramahansa is the founder of the World Peace Mission based in Penzance <http://worldpeacemission.com>

The Music of the Universe (continued)

It can be shown that these are sufficient to define the 12 tones of the octave, in other words the piano keyboard. [Curiously, the seven octaves of this keyboard correspond exactly to the 81 stable elements.] The hydrogen sequence, the first one I give, translates as $3/2$ = a musical "fifth" or 7 semitones, $4/3$ a "fourth" or five semitones, $5/3$ is 9 semitones and $8/5$ is 8 semitones. Elementary maths gives all the other intervals. All elements have the same electrons, just the number of them differs. Big bands, small bands. They exist in "shells" or ring roads around the nucleus of the atom. When they change lane they emit or absorb light. That light reaches us and creates and sustains all the life of the Nature in which we live.

The organic molecule corresponds to $3/2$, $4/3$, and the discord with Nitrogen that lies between them (illustrated below). "The devils riff." The motions of the planets, the structure of "time", and "seasons" are also harmonic. A membrane is an essential feature of life and of the organic molecule. Music uses attraction and repulsion for this. $3/2$ and $4/3$ are the attractions and the discord $7/5$ is the repulsion. $3/2$ is Hydrogen/Oxygen, $4/3$ is Hydrogen-Carbon, and $7/5$ is Hydrogen-Nitrogen (the basis of explosives).

The "Devil's Riff" is a slide through the membrane from $4/3$ to $3/2$ across $7/5$. An example is sliding between the chords C-F and C-G across C-F#. This is the membrane in operation.

All Nature is singing to us.

Above: The alignment of the Organic Molecule

The Subject of Death

By Masami Saionji

It has long been considered taboo to speak about death and although there are some who seek death as an escape from pain or difficulty; the majority of us look upon death with loathing or suspicion rather than regarding it as a normal part of life.

In the course of our lives we are faced with such questions as *How are human beings meant to live? Why was I born into this world? What is the value of my existence?* and so on. If we are preoccupied with questions like these, while continuing to ignore the question of death, the answers that arrive will not be genuine. This is because the underlying issue of death is interwoven in all these questions. If we try to find the meaning of life without looking into the meaning of death, no true solutions can be found.

When we think seriously about how to greet a radiant death a radiant life will begin to unfold for us. The more we think about life the more we must think about death.

A great many people remain in the dark about their own death right up to the moment when they leave this world; the more closely death approaches the more inauspicious the subject becomes.

This applies not just to those who are passing away but also to the people around them who can become overly sensitive about the subject of death, dreading it and sometimes refusing to discuss it at all. Even when it is clear that the time left is very short, custom often prohibits any mention of death people often considering that it is their moral duty to behave in this way.

To live in this way is a serious distortion of the truth and to continue to live without knowing the truth your lifestyle will not reflect your true inner dignity. Your life will not have the significance that it is meant to have.

To live life as it is meant to be lived we must understand what death is. By learning to face our deaths we will be freed from our anxieties. If we thoroughly examine our anxieties, fears, frustrations, ill health and feelings of discord we might find that many are rooted in a fear of death. You might tell yourself that this is not the case but the fundamental truth is that much of human anguish, sorrow and pain are born from a fear of death and the more you adhere to a fear of death the more painful life can seem.

Death is a momentous occasion and should be greeted with the atmosphere and well-wishing. It celebrates the unending peace that comes when the spirit is released from all physical attachments. Death signifies re-birth; the start of another journey into a world without fear and of perfect freedom for the human spirit continues to live after death. The physical encasement of a body was always temporary and the more we can recognise this whilst alive, the more our lives will come alive through experiencing life.
